

Team Name: T-Recs

Team Members: Matthew Kwong, Yi Lai, and Yuanjian Gao

=====

Ideas Brainstorming :

1. Recommendation system or something else related to data science?

- Recommendation system: movie, TV show, books, game, restaurant, shopping, social network, attraction
- Prediction: stock, price, trend, game result
- Classification: picture, figure, word

2. Classification: predict whether a given Kickstarter campaign will succeed or fail, given its location, target money amount, due date, type of campaign, etc. (dataset: <https://www.kaggle.com/wood2174/mapkickstarter#MasterKickstarter.csv>).

3. Classification: predict whether a given Wikipedia Request for Adminship (RfA) will be approved or not, given the user's past contributions to wiki articles (dataset: <https://snap.stanford.edu/data/wiki-Vote.html>).

4. Recommendation: given a user and their demographics (age, gender, marital status, etc.), recommend an activity that will bring them happiness (dataset: <https://www.kaggle.com/ritresearch/happydb>)

5. Recommendation: recommend restaurant based on the google local business review. <http://cseweb.ucsd.edu/~jmcauley/datasets.html>
